

Advanced Silver

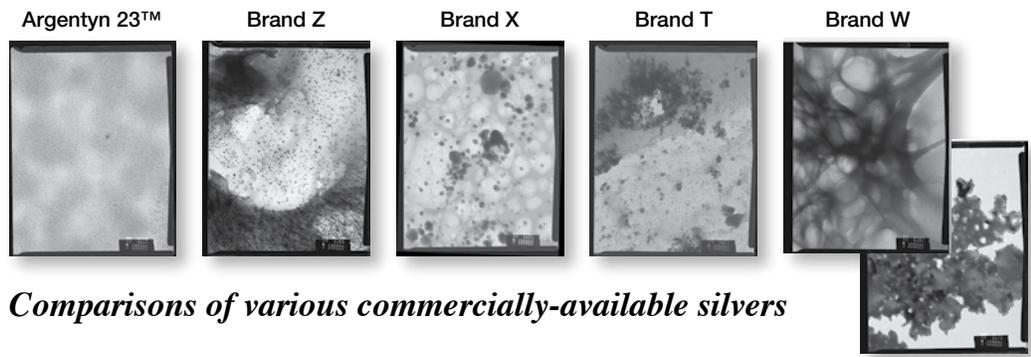

From the makers of Sovereign Silver™, Argentyn 23™ is a completely unique, next-generation silver product produced exclusively for physicians and healthcare practitioners. Not to be confused with colloidal silver, Argentyn 23™ is silver hydrosol, a specific scientific term describing ultra pure silver in ultra pure water. Unlike the various colloidal silver products on the market today, silver hydrosol is completely free of contaminants such as silver proteins, oxidators, stabilizers, nitrates, or other silver compounds (see comparison photos below). Silver hydrosol represents the purest and most advanced silver technology available today.
