Bio-D-Mulsion Forte®

Why you may need Bio-D-Mulsion Forte®: Vitamin D is an essential co-factor in bone health. Among several other properties, vitamin D promotes the absorption of calcium and phosphorus, both of which are needed for bone health. Additionally, vitamin D regulates blood serum levels of these two minerals to maintain adequate mineralization of bone, bone growth and bone remodeling. Researchers from the Harvard Medical School published results of a large-scale study in the American Journal of Clinical Nutrition in February of 2003, confirming that there was a significantly lower risk of hip fractures only in individuals with a higher intake of calcium coupled with a higher intake of vitamin D. Vitamin D also plays several other important roles in human health including regulation of hormonal functions, modulation of neuromuscular and immune functions, reduction of inflammation, maintenance of vascular integrity, and proper gene encoding.

Why your healthcare practitioner recommends Bio-D-Mulsion Forte® from Biotics Research:

Vitamin D deficiency is common in the US, and more common in the elderly. It is known that the farther away from the equator you live the more at risk you are. Even worse, a recent study found that approximately 70% of the population of Phoenix, AZ had sub-optimal levels of vitamin D. If you wear sunscreen of SPF 8 or more, it is very unlikely that your skin is able to convert sunlight into vitamin D at all. A report published by Danish researchers in March 2004 showed that daily supplementation of vitamin D can reduce the risk of bone fractures and osteoporosis. A recent study conducted at Children's Hospital Boston, found that **Bio-D-Mulsion Forte®** was safe and effective for infants and toddlers. **Bio-D-Mulsion Forte®** was shown to be highly bio-available, as effective as the pharmaceutical preparations it was compared to, and easier to administer. Additionally, **Bio-D-Mulsion Forte®** is far more cost effective. Clinical studies have shown **Bio-D-Mulsion Forte®** to be safe and effective for healthy adults, infants and children, as well as for those suffering from prostate cancer. **Bio-D-Mulsion Forte®** employs Biotics Research's unique, all natural micro-emulsification, which greatly enhances the uptake and utilization, and is especially important for those having impaired digestive function. Additionally, in a recent study of the vitamin D products tested, only **Bio-D-Mulsion Forte®** met specified quality standards for label claim and dose to dose consistency. This is another example of leading-edge innovation from Biotics Research, bringing you "The Best of Science and Nature".

Supplement Facts

Serving Size: 1 Drop

	Amount Per Serving	% Daily Value
Vitamin D (as cholecalciferol)	2,000 IU	500%

Other ingredients: Water and gum arabic emulsifier base, and sesame seed oil.

Bio-D-Mulsion Forte® is an oil-in-water emulsion. Vitamin D oil has been dispersed into microscopic particles to aid absorption and assimilation.

This product is gluten and dairy free.

RECOMMENDATION: One (1) drop each day as a dietary supplement or as otherwise directed by a healthcare professional.

This product is intended to be used under the direction and supervision of a healthcare professional. Use only as recommended unless otherwise directed.

KEEP OUT OF REACH OF CHILDREN

Store in a cool, dry area.
Sealed with an imprinted safety seal for your protection.

Product # 1012 Rev. 02/13
